

PACIFIC NW PROPERTIES HAS GONE SOLAR!

217 Corporate Place in Beaverton

WHY SOLAR PANELS?

It's good for the environment and provides cost savings for our Tenants! With help from NW Photon Energy (www.nwphotonenergy.com), Pacific NW Properties is "going green"! In the past 90 days, we've equipped our roof tops with photovoltaic (PV) solar panels at both Tigard Triangle Commons as well as 217 Corporate Place. Next up, 72nd Corporate Center in Tigard, which will begin work in 4th quarter.

BENEFITS

Converting sunlight to electricity helps the environment by reducing our carbon footprint, decreasing harmful emissions and producing clean, renewable energy for the future. We anticipate annual savings of 300 tons of CO₂, the equivalent of planting 8,000 trees per year! In addition to these environmental benefits, our solar panel system will directly result in significant cost savings for our properties and tenants.

PNWP CARES

We're excited to offer an alternative energy source in our buildings and be in the forefront of environmental responsibility and conservation. Pacific NW Properties is on a mission to keep our beautiful state even greener!
